1. The chart refers to courses offered during the **2009-2010 school year** and is not a cumulative or historical table. Courses completed in prior years may be acceptable for admission purposes. The chart is advisory only and is intended for information, particularly for high school educators.
2. The chart reflects the **common policies** of Alberta's universities and private university colleges in recognizing courses taken in other provinces that are acceptable for admission purposes in lieu of Alberta 30-level courses. The information is accurate as of the revision date, but **subject to change without notice**. The chart is not exhaustive; only courses that are accepted in common by all 7 institutions are included. In addition, individual institutions may accept other courses for admission purposes. For further information on acceptable courses, contact the institution directly. Note: Athabasca University has an open admissions policy which does not require high school prerequisites for admission to the University.

While accepted for admission purposes, these courses may be applied in different ways by the institutions. For further information on acceptance of out-of-province courses by Alberta's universities and private university colleges, please contact the appropriate institution. For contact information, please refer to Section III.

For information on acceptance of out-of-province courses by other Alberta post-secondary institutions, please contact the appropriate institution's enrolment/admissions department.

3. At CUCA, subjects classified under "Other Soc Studies" may be used only in lieu of Social Studies 30.
4. Geography 12 or Comparative Civilizations 12 is acceptable, except at UofC where Comparative Civilizations 12 is only acceptable as a non-academic option subject.
5. Applicants to UofA, UofL, and UofC cannot present both History 121 or 122 and World Issues 120.
6. Applicants to UofA, UofL, and UofC require both Advanced Mathematics 45S and Introduction to Calculus 45S.
7. Science 30 cannot be substituted for specific Grade 12 science courses (i.e. Biology 30, Chemistry 30, Physics 30) required for admission.
8. UofC will also accept MGA4U or MCB4u to satisfy the Math (Algebra) requirements. Applicants to Engineering must present both MCB4U and MGA4U.
