2026 JFR Information: Crew Member

Six W's of JFR

What

The Junior Forest Ranger program is a paid summer job that exposes high school students to a wide variety of careers in the natural resource sector. This includes everything under forestry, wildfire, environment and parks, conservation, stewardship and fish and wildlife.

The work projects you may take part in include trail building, electrofishing, stream assessments, helicopter rides, getting out to an actual wildfire or mock wildfire, ATV certification, mountain pine beetle work, flora and fauna identification, assisting with wildlife research, and every crew takes part in various opportunities of Indigenous learning. These are just some of the projects you may take part in during the summer, as it depends on the area you are stationed.

The projects that are planned are organized by the Crew Leaders before the summer begins. These projects are based on the six pillars of the JFR program which are all formed by the partnerships we have developed over the last 60+ years. These are the six pillars which make up the JFR program:

1. Wildfire: Introduce JFR crews to wildfire prevention, wildfire operations, emergency preparedness and recovery. Projects build awareness of how wildfire affects Alberta's landscapes and communities and how trained personnel prepare for, respond to and recover from emergencies.
2. Natural Resources and the Environment: Build knowledge and practical understanding of Alberta's forests, ecosystems, wildlife, vegetation, habitat and environmental conditions. Projects help JFR crews observe the natural world, collect or interpret information, and understand how natural-resource professionals monitor and manage it.
3. Parks and Stewardship: Develop the skills, awareness and sense of responsibility needed to care for Alberta's parks, trails, recreation sites and other natural spaces. Projects give crews opportunities to contribute practical work that supports safe and responsible outdoor recreation.
4. Technical Skills and Certifications: Build practical outdoor and field skills that help JFR crews work safely, navigate unfamiliar places, use equipment appropriately and become more capable in outdoor settings. Some skills can be taught by trained JFR leaders and specialized or regulated activities require qualified instructors.
5. Community Engagement and Outreach: Develop leadership skills and build connections with the communities they work in. Leaders and Crew members take on different leadership opportunities, community events, help the public understand the JFR program and the value of Alberta's natural spaces and natural resource work.
6. Culture and TEK: Provide opportunities for JFR crews to learn about First Nations and Métis communities in Alberta, their cultures and relationships with the land, and environmental observations and teachings shared through Elders and Knowledge Keepers. Activities should be guided by community partners and delivered respectfully, with attention to local protocols and permissions.

Who

Crew members are 16-18 years old as of July 1st. Successful applicants are placed on a crew of up to seven crew members, a senior member, and two crew leaders for a total of seven weeks. We will hire up to 49 crew members for this summer. Prerequisites for Crew Members:

- 16-18 years old as of July 1st
- A full-time high school student in Alberta
- In good physical condition
- Prepared to live and work in the outdoors
- Willing to take on new challenges and have fun!

Where

Every JFR crew stays at or near a wildfire base in cabins or trailers. Some of the nights will be spent in tents if you are completing a project farther away from base. There are times during the summer where you may be living and working in semi-remote locations. The locations for this upcoming summer include Peace River, Grande Prairie, Lac La Biche, Fort McMurray, Calgary, Hinton, and Whitecourt.

When

The deadline to apply is April 1st every year and the applications will be available at the beginning of February on our website (www.albertajfr.ca). Everyone who submits a full application by the deadline has the opportunity for a virtual interview.

The program will begin the first week of July with training taking place at the Hinton Training Centre. The program lasts until the end of August with Bull of the Woods.

Why

The JFR program offers an amazing career building opportunity for students, to help prepare them for their future. The summer offers a rewarding, challenging and fun experience. Crew Members will meet new people from across Alberta and be able to see new parts of the province. Crew Members gain valuable job experience in natural resource management, have the chance to meet professionals in the field, and learn about what careers they may be interested in and the different paths available.

Work Experience

The Junior Forest Rangers program is able to award work experience credits (up to 10) with the support of the local school authority or Careers the Next Generation. Where possible, we work together with the student, the school and Careers to put this credit in place for interested students. This process must begin before the end of the school year. Students must complete HCS 3000 course prior to the summer.

Other

- Paid summer employment ($16.00/hr)
- Free accommodations and meals for the summer
- Evenings and weekends are usually spent hanging around camp, having a campfire, playing sports or games, going
